

Los Angeles County Harbor-UCLA

Pediatric Critical Care at Harbor-UCLA Medical Center and CHOC Children's Hospital of Orange County

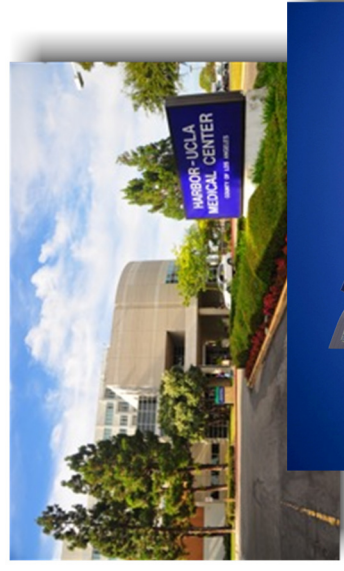

Our fellowship program is a multi-disciplinary clinical and research training program which has been accredited by the ACGME since 1990. Our goal is to provide the trainee with the necessary knowledge and skills to optimally care for critically ill children. These goals are accomplished through clinical service, structured conferences, and consistent feedback.

Pediatric Critical Care Medicine Fellowship

at Harbor-UCLA Medical Center & CHOC Children's Hospital of Orange County

Graduation Dinner, 2010

What Makes Us Unique

The strength of our program is based on the complementary experiences obtained in the two hospitals. Harbor-UCLA is a Los Angeles County institution with academic sponsorship from UCLA, while CHOC Children's Hospital of Orange County (CHOC) is a tertiary children's center.

At Harbor-UCLA, the Fellow is exposed to a wide variety of pathology predominantly from an underserved population. As Harbor-UCLA is one of Los Angeles County's designated pediatric trauma centers, one gains a significant amount of exposure in caring for children with traumatic injuries.

In addition to a large inpatient PICU service, CHOC delivers an experience which includes a dedicated Cardiac ICU (CVICU), transport and sedation services, as well as higher level therapies such as bone marrow transplantation and ECMO.

Our Program

Rotating at these 2 centers, the Fellow will:

- Practice in 2 hospitals which are highly complementary both in patient population and administrative structure
- Interface with over 14 board-certified pediatric intensivists as well as numerous subspecialists dedicated to pediatrics
- Engage in a structured curriculum:

| | |
|-------------------------------------|---|
| Clinical Duties | PICU, CVICU, Trauma, Anesthesia, Sedation, Elective |
| Weekly Fellow Conference | Journal Club Case Conference Case Question Sessions Interactive Sessions on Professionalism, Communication, Bioethics, QI, and more Didactic Series |
| Monthly Scholarly Activity Seminars | Tools for academic success Fellow presentations on project progress Consistent faculty guidance on research project |

We consistently strive to provide exceptional educational and research opportunities; our educational innovations received a "Notable Practices" commendation from the ACGME, and our faculty and fellows have received numerous teaching awards. Please visit our Fellowship website for further information:

About the South Bay and Orange County

The South Bay is seated in the Southern portion of Los Angeles along the Pacific Ocean, while Orange County lies to

the south, nestled in between the Santa Ana mountains and the beach. Both offer a wide range of services such as restaurants, shopping, museums, with world-class entertainment

and sporting venues. The proximity to the Pacific Ocean provides a temperate climate which allows for year-round outdoor activities. Sailing, surfing, hiking, and mountain-biking are within easy reach, with miles of sandy beaches and abundant parks to explore. For snow sport enthusiasts, great conditions can be found in the nearby San Gabriel mountains, or world-class Mammoth Mountain in the Sierra Nevada mountain range.

Los Angeles County is one of the most culturally diverse areas in the country, and together with Orange County, serve a population of about 13 million. The large area and population afford services and opportunity which are unparalleled across the country.
